Subject: AZR _ Mooresboro Draft Investigation Plan

Jeff, Brent and John,

On behalf of AZP, EnSafe has developed a conceptual sampling and analysis plan to immediately investigate soils, subsoils, groundwater, surface water and sediments that may have been impacted by the raffinate and other west ponds at the Mooresboro plant. We had expected to present that plan to you this afternoon. In the meantime however, we understand that EPA/NC attorneys have scheduled a call for Monday morning on this issue as well.

So we have prepared a summary of the plan as a PowerPoint presentation for Monday, and will be available to accept and implement any immediate thoughts you may have and submit plan thereafter. I trust this is satisfactory.

We are also making logistical plans to launch this investigation as quickly as a consensus is achieved on its scope.

Phil Coop
Project Manager
